WALLEYS QUARRY KPI REPORT

Date of Report: September						
Landfill Operations		Information	Measurement	Summary and Actions (Additional Document Reference as applicable)		
KPI 1	WASTE ACCEPTANCE	Non- conformance	CCS score(s) including summary and actions.	0 Non-conformance raised with operator.		
		raised with waste operator		0 CCS scores received		
KPI 2		No of loads inspected.	each	1712 loads received.		
		irispected.		1712 loads inspected.		
	Operations	Information	Measurement	Summary and Actions (Additional Document Reference as applicable)		
KPI 3	ODOUR MANAGEMENT	Non- conformance	CCS score(s) including summary and actions.	0 Non-conformance raised with operator.		
		raised with waste	,	0 CCS scores received.		
		operator		0 non conformances identified.		
1/51 /		No of od				
KPI4		No of odour tours		61 tours		
		No of odour tours where odour				
		detected off site		0 external odours.		
Landfill	Operations	Information	Measurement	Summary and Actions (Additional Document Reference as applicable)		
KPI 5	ACTIVE TIPPING AREA	Operational	m3	122,238m2		
KPI 6	ACTIVE TIPPING AREA	Surface area total Active tipping	m3	14,030m2		
Landfill	Operations	area Information	Measurement	Summary and Actions (Additional Document Reference as applicable)		
KPI 7	CAPPING OF		m3	Sammary and Actions (Maditional Bocament Netericlenice as applicable)		
	OPERATION AREA	Temporary capping		Temporary Capping 19,640m2 (16%)		
	OPERATION AREA					
		Permanent	m3	Permanent Capping 50,355m2 (41%)		
		capping	1115			
				Total Capped area 69,995m2 (57%)		
	Operations	Information	Measurement	Summary and Actions (Additional Document Reference as applicable)		
KPI 8	LANDFILL GAS	Surface & Gas infrastructure	Number of remaining matters open in the	0		
	MANAGEMENT	emission surveys	month			
KPI 9	LANDFILL GAS	Concentration of Hydrogen	ppm	1,762 ppm – recorded from CLP H2S GUP input data		
		riyarogen		and the state of t		

WALLEYS QUARRY KPI REPORT

KPI 10	LANDFILL GAS MANAGEMENT	Landfill Gas capture rate (monitored at the GUP)	m3/hr	3,245m3/hr - averaged across period
KPI 11	LANDFILL GAS MANAGEMENT	Appendix A LGMP Gas Management Plan (live document)	Progress including summary and actions	See explanatory notes
Landfill C	Operations	Information	Measurement	Summary and Actions (Additional Document Reference as applicable)
KPI 12	LEACHATE MANAGEMENT ACTION PLAN	Actions (13 actions)	Progress including summary and actions	See explanatory notes.
Landfill C	Operations	Information	Measurement	Summary and Actions (Additional Document Reference as applicable)
KPI 13	PRIMARY REGULATOR	Compliance Assessments Visits	Number undertaken for which CAR form issued to operator	Three visits within the period: 10 th August 2023 – DP3734DC/0471278 28 th August 2023 – DP3734DC/0472621 17 August 2023 - EA Leachate audit– CAR not issued.
KPI 14	PRIMARY REGULATOR	Compliance Assessments Visits	Number Undertaken where a CCS score is raised with operator, including summary and actions	O regulatory compliance assessments undertaken which resulted in a compliance assessment score – see explanatory notes.
KPI 15	PRIMARY REGULATOR	Compliance Assessments Visits	Number Undertaken where no CCS score is raised with operator, including summary and actions	2 regulatory compliance assessments undertaken which resulted in 0 compliance assessment scores

WALLEYS NuLBC KPIs Explanatory Notes

Date of Explanatory Notes: August 2023

KPI 1 and KPI 2 Waste Acceptance

No non-conformances have been received from the regulator within the period.

1712 loads inspected within the period, with 0 loads rejected.

KPI 3 and KPI 4 Odour Management

No non-conformances have been received from the regulator within the month, with two site regulatory inspections confirming no direct offsite odour detected by Environment Agency officers. The Agency assessments cover a wide scope of permit conditions including engineering, containment, operational activities, landfill gas management, odour and pest management.

61 odour tours conducted by WQL, with 61 reflecting no odours experienced. Contemporaneously with these odour tours, checks on the gas collection and treatment infrastructure, site engineering and operations and local weather factors were reviewed to ensure all appropriate actions were being undertaken. No nonconformances were identified during these times. And all appropriate actions were being taken.

KPI 5 and 6 Active Tipping Area

The overall current landfill 122,238m2. The active area is confined to Cell 4 and 2. The current active area remains contained and measures some 14,032m2. This is aligned with the approved capping and phasing plan, as agreed with the Environment Agency. The active operational area is progressively covered during the day to minimise the time that fresh waste remains uncovered. This is in line with best practice and our operating techniques. We retain healthy stockpiles of cover material to facilitate this progressive covering.

KPI 7 Temporary Capping

Currently, 19,640m2 of the surface area of the facility is temporarily capped, either using a high specification, low permeability engineering clay or an installed geomembrane. This is in line with the capping and phasing plan for the facility, as agreed with the Environment Agency and an increase on the previous period. Maintenance works continue to clay capped areas in line with the agreed (by the Environment Agency) CQA (Construction Quality Assurance) specifications.

Permanent Capping

Relating to permanent capping, 50,335 m2 of the surface area of the facility is capped, by the installation of a low permeability geomembrane. This is in line with the capping and phasing plan for the facility, as agreed with the Environment Agency with all permanent capping works being conducted under the process of Construction Quality Assurance (CQA). On completion of the permanent capping works, cover soils continue to be imported to the facility as part of the site restoration process.

WALLEYS NuLBC KPIs Explanatory Notes

KPI 8 - 10 Landfill gas management

WQL continues to undertake the extensive regime of surface emission surveys, as agreed with the Environment Agency. A FID survey was conducted in July 2023.

The concentration of H2S at the facility remains within expected limits and in January, averaging 1,762ppm at the Gas Utilisation Plant (GUP), as measured by CLP Envirogas Ltd and representing a reduction on the previous period.

The volume of gas captured at the facility remains within expected limits, at 3245m3/hr, an increase on the previous period. The flow rate has remained high and consistent across the period. WQL continue to review this position and drive the gas management contractor, CLP Envirogas Ltd to ensure that gas collection is continually reviewed to assess relevant developments that can be made.

An additional 13 vertical gas wells were installed at the facility in August 2023.

KPI 11 Landfill Gas Management - Landfill Gas Management Plan

The LFGMP continues to be developed by WQL and adopted by CLP Envirogas Ltd. From Appendix A of this document, three actions remain open and in progress, namely:

Site Specific Balancing Plan – this is being developed by WQL, in conjunction with the Environment Agency and CLP Envirogas Ltd. A draft has been received and is being reviewed, prior to agreement and submission to the Environment Agency.

Regular monitoring, requested by the Environment Agency of CLP Envirogas Ltd continues and is likely to remain in place.

Installation of horizontal wells in active operational areas continues as the site develops, in line with the approved LFGMP.

The LFGMP has been reviewed and issued to the Environment Agency, with comments received from the regulator on 2 June 2023 following the submission on 15 January 2023. The draft LFGMP has been discussed with NuLBC and was submitted to the Environment Agency on 14 August 2023 for approval. It is not anticipated that its approval will be unduly delayed.

KPI 12 Leachate Management Plan

In relation to the LMP, a specialist drilling contractor has been obtained and the work (well drilling and installation) commenced in late August 2023. This will see the installation of 5 replacement leachate wells at the facility. The works are scheduled to conclude in late September.

WALLEYS NuLBC KPIs Explanatory Notes

KPI 13-15

10 August 2023

0471278 – no compliance scores received, and no odours identified by the Environment Agency.

21 August 2023

0471954 - sign-off of sidewall engineering. no compliance scores received.

28 August 2023

0472621 – no compliance scores received, and no odours identified by the Environment Agency.
