[Newcastle-under-Lyme Borough Council](#) in collaboration with [Climate Ambassadors](#)

School Sustainability Stakeholder Catalogue

Introduction

The [Department for Education \(DfE\)](#) aims to ensure that all education settings of all levels have a nominated sustainability lead and put in place a climate action plan by the end of 2025 which is the purpose of the newly created Climate Ambassadors Programme. Without the right experts, contacts and stakeholders' education settings won't be able to achieve this goal. This is why [Newcastle-under-Lyme Borough Council](#) created the Climate Action Planning Framework and Template in collaboration with the Department for Education-funded [Climate Ambassadors](#) programme, to support education settings to create detailed and impactful strategies and plans. Alongside these important action crating documents, the Council thought it significant to also create a document that details organisations that schools can contact for expertise, activities and advice especially for events and education opportunities during Green Careers Week for example.

The stakeholders in this catalogue will each have expertise in the 4 action themes that the Department for Education has identified including decarbonisation, adaptation and resilience, biodiversity, and climate education and green careers. Together through the framework and key collaboration the education sector in the UK can create innovative plans to drive positive sustainable change for the benefit of current and future generations.

Sustainability Stakeholder Catalogue

The table below summarises various expert contacts that Newcastle-under-Lyme Borough Council have engaged with before within the West Midlands for education settings to contact and collaborate with to create informed sustainable action. The table below details the organisations name, summarises their activities, website, contact and what action theme(s) they relate too. All organisations are listed by alphabetical order to ensure easier access. All organisations also have what action themes (decarbonisation, adaptation and resilience, biodiversity, and climate education and green careers) and work activities they are related too, for example a Council will have #Government in their row whereas a company that creates strategies will be under #Consultancy. All stakeholders below will have free and paid services available for education settings, so please do get in contact with any listed stakeholders below and they can present these services. Please search these terms in the documents “Find” tool to see which organisations match what your education setting is looking for.

<p>Teach the Future</p> 	<p>Teach the Future is a campaign led by secondary and tertiary education students to greatly improve education on the climate emergency and ecological crisis in the UK. We are campaigning for change across the whole of the UK, but education in the UK is a devolved matter, meaning there are different education ministers and education laws in England, Scotland, Wales and Northern Ireland. A lot of our work is relevant across the UK, but we also have specific campaign branches in Scotland, Wales, Northern Ireland and England.</p>	https://www.teachthefuture.uk/	hello@teachthefuture.uk	<p>#Decarbonisation #Biodiversity #Adaptation & Resilience #Climate Education & Green Careers #Charity</p>
