

Matter 6 for AB33

For the attention of Ann Jordan inspector

Please note I have many photos each month of the flooding on AB33, also that cattle are farmed here. Yet the local plan says this land is not farmed.

This field has water throughout the year, yet nothing mentioned in the local plan.

Nothing about upgrading the victoriana drainage that struggles now.

It is land on a starter farm, one of two, the other one next door is a well run business for the local community Bona Fide farmers on Park Lane. These starter farms are needed and important for the community. It is not exceptional circumstances to lose this grade 3 greenbelt agricultural .

Further photos available.

I wish to attend the meeting that will discuss the housing for Audley, please confirm the days.

Regards
Jeanette Gilmour

Please see photos and detail below

This field is included for house building in Newcastle local plan.

It looks more like a nature reserve now!

For the attention of Ann Jordan inspector

Further photos of flooding on AB33, where houses are proposed.

These are not recorded on the local plan.

Regards

Jeanette Gilmour
